Mobile.Gate 'CheckApp'

Simple, secure
and 100% mobile

With the new Mobile.Gate 'CheckApp' you can move your access control point to wherever the customer is. Simple, secure and 100% mobile. Whether for cross-country skiers or ski tourers, you will have total control flexibility by being closer to your customers than ever before. All you need is the Mobile.Gate 'CheckApp' and either a mobile network or Wi-Fi.

Flexible in handling

No special hardware is needed - just a mobile device using the Android operating system. The choice of device is entirely up to you. The Mobile.Gate 'CheckApp' works on every device.

Quick and uncomplicated

Operating the Mobile.Gate 'CheckApp' is easy, so there is no need for extensive training. RFID or barcode tickets can be read with just one click. This makes the SKIDATA solution especially well-suited for part-time and temporary workers.

Optimal distribution of resources

With the help of this portable "gate" you can react quickly to redistribute resources to meet demands in the most effective way. Especially when things get busy, this means shorter waiting times and happier customers.

Small cost, huge value

With various options, the Mobile.Gate 'CheckApp' can be perfectly tailored to meet your specific needs. Create new revenue streams - for example, by also using the app in summer or at special events.
