

skiosk® Smart 'Refund'

Card return service
24/7/365

24 hours a day, 7 days a week, 365 days a year - the skiosk Smart 'Refund' makes returning cards easy for your guests. The ideal way to reduce the workload on your cashiers, save staff costs and offer unlimited operating hours.

Around the clock

Regardless of how long the ski day lasts, the card return specialist is available to your guests around the clock. And because monitoring and control of the self-service kiosks are done centrally, you also keep an eye on everything 24/7.

Simple, flexible and secure

Returning a keycard only needs a couple of steps. The digital kiosk even accepts several cards in one transaction and then dispenses the refund total in the appropriate denominations of bills and coins. A database comparison allows for the reliable recognition of the card types in your assortment and rejects cards that are invalid or have been manipulated.

Well equipped

The skiosk Smart 'Refund' is low maintenance by design. The secure, self-locking card box can hold an impressive 900 keycards. In combination with a matching large capacity for bills and coins, the self-service kiosk is well prepared for long periods of operation without the need for restocking.

Multi-purpose monitor

Even in screensaver mode, the digital kiosk is working to bring you profits. Make use of the 10.4-inch touchscreen and the A5-sized information panel for your own advertising purposes or turn it into an additional source of income by making the advertising space available to business partners.
