Handshake.Logic 'Server'

Flexible, Effective

The leading software for admission control at attraction parks, multi-function arenas, sport- and concert events.

Flexible

Handshake.Logic suits every size of event from the smallest attraction park to the largest sports arena. It adapts uniquely to every venue and situation. A concert today, a sporting event tomorrow. Simple configuration instead of laborious adaption.

Secure

Counterfeit tickets aren't a problem. Adults with children's tickets are a problem of yesterday, and you can forget about unauthorized disclosure. Only valid tickets entitle the holder to admission with a ticket-checking system that can operate online, offline, locally installed or hosted. Handshake.Logic ensures state-of-the-art security anywhere, at any time.

Effective

Handshake.Logic will reduce ticket misuse and therefore increase revenue permanently, bringing you a large and quick return on investment. Automated ticket checks ensure high throughput at the checkpoint and increase the security of the event, as well as enhancing the visitor experience.

Service-oriented

Automated access control enables you to deploy your staff where it is needed most, which improves your service quality even more. The included SKIDATA experience ensures great know-how and service to help you to easierly achieve your goals.
