MobileReader.Gate

On the go – always in control!

Reading and writing RFID data carriers
– anywhere, anytime, with full freedom of
movement...

Ultimate ease of use

- **Fits nicely in your palm:** Smooth, convenient handling makes even long-term use a pleasure.
- **You'll only need to lift one finger:** Convenient ticket authentication either in continuous auto-read operating mode or at push of a single button.
- **Look and listen:** Visual and acoustic feedback help to make ticket authentication quick & easy.
- **Always at hand:** To keep your MobileReader handy use the palm or wrist strap, lanyard or belt clip, or simply keep it in your pocket.

Ticket checker with a long attention span

- **Stays operational longer than many would want it to:** The durable design and high-quality rechargeable battery ensure long battery run times under any operating conditions
– from snow and ice to tropical sunshine.

Ticket cheats don't stand a chance

- **Protect your money:** Authenticate permissions on RFID tickets with a PDA (e.g. Handheld.Gate) on-line
– anytime, anywhere.

Stay independent

- **SKIDATA and more:** MobileReader.Gate is the basic device for reading common 13 MHz data carriers – also suitable for SKIDATA proximity applications.
- **Universally rechargeable:** The standard plug of modern mobile phone power adapters also fits MobileReader.Gate
– for you this means you can simply re-charge the unit 'on the go', no matter where you are...

Great value for money

- **Suitable for outdoor use:** Don't worry, be happy – about the low cost of ownership of this range of mobile devices, which operate reliably in any weather conditions.
- **Future-proof design included:** MobileReader.Gate is a safe investment all round, using the latest RFID technology that keeps up with technical progress and pays for itself soon.
