

Management.Services SD.RDM 5.0

Mountain operator
specific reports on all
decision-making levels

Create the prime conditions for revenue-generating decisions and make optimal use of your data for future-oriented marketing. With SKIDATA Report and Data Management (SD.RDM) you will have a detailed overview of your products and offerings, and you will be able to manage your operations professionally.

Know more, make better decisions

Use your collected data– every customer transaction provides you with valuable information. Make the most of your data with perfect statistical analysis for Mountain resort operators. Professionally prepared and individually configured reports provide you with an excellent oversight. The worldwide and decades-long experience of SKIDATA supports you to keep an eye on the key performance indicators of a Mountain resort and to take the best decisions for future business.

Use data flexibly and securely

For further use of your generated reports and data adapted to your processes, you can export them to common formats such as pdf or Excel at the click of a mouse. Moreover send these files via e-mail to deploy data across your enterprise. Alternative use Excel Pivot Services directly from the application. You define who has read and/or write authorization for data and reports via a finely tuned permissions system, even for the most complex Ski pools. The secured access to the key performing indicators is a naturalness of the SKIDATA Mountain Solution.

Well prepared reports – neat and user-friendly

Easy to generate, easy to use – more than 100 default reports are available from the beginning, all individually configurable. A great advantage for both new customers and of course for your new employees. Store frequently used reports as favorites or group them individually for quick and easy access. 100% focused on effective reporting.

Create individual reports

In addition to the many default reports they can be edited for visualization with special diagrams, tables and comparisons. Optionally, SD.RDM can automatically generate, export and send your reports via e-mail. It is also possible to print reports automatically.
