

Sales.Services 'sweb.Contract B2C'

Office work is mostly a thing of the past. With the sales service sweb.Contract B2C every contract parker can complete their rental agreement over the Internet. A 'win-win' situation both for you and your regular customers.

Save time and reduce costs

- Give tasks and the responsibility to your parking facility users and let them complete a contract with you on their own over the Internet.
- The self-registration of contract parkers saves you time and human resources.

Increase sales through an additional sales channel

- Integrate the service into your website and your social media presence and address new and previously unreached customer groups.
- Generate – without increased effort – additional revenue.

Simple processes increase acceptance

- The Internet sale takes place using a simple, clear, step-by-step process, such as those known from hotel booking platforms.
- The service doesn't require a complex installation or local programs – a standard Internet access is sufficient.

24/7 online service for your customers

- Your Internet sales service is not bound to office opening times and is therefore available to your customers anytime and anywhere.
- Monthly rents can be automatically collected, for example, from the credit card account given by a customer.
